CAREER OBJECTIVE

Ejike Augustus Chuwkudi is a graduate of Accountancy from Alex Ekwueme Federal University, Ebonyi State. His interest in Software Development and Business Analysis led to a role at Bitxbase Technology Coding Academy as a junior Software Developer developing responsive UI(User interface) and providing a comprehensive database. As a recent graduate with strong interests in computer and software development and graphics design, I think that learning never ends, hence the requirement for my continual learning is non-negotiable. I consider myself to be an open-minded person who places a high value on teamwork, so I think that working with others who share my views and in a setting of high standards will help me broaden and deepen my knowledge base, enhance my technical and programming skills, and generally increase productivity. As a result, I eagerly anticipate continuing possibilities to develop my technical and professional skills in the best setting.

Career Experience

- Maintained code quality across multiple environments and ensured compliance with defined coding standards and best practices by collaborating with other leads and developers.
- In collaboration with the project manager and the design team, I developed and implemented innovative design systems and software solutions that greatly enhanced client-side performance.
- With my knowledge in graphics designing, I designed posters and flyers for social media contents and webpages.
